

JAY - J2 Cushion

JAY[®]

- Designed for the client who has moderate to more aggressive postural needs that may change over time
- The J2 pre-contoured, closed-cell, lightweight, foam base provides excellent lateral and forward/rearward stability creating a foundation for postural stability
- The base fluid pad can be modified/customised on site to accommodate fixed postures or to correct flexible postures. Modifications can support changing needs over time
- Optional solid seat inserts provide extra postural stability discouraging the cushion from slinging with the chair upholstery
- Postural accessories such as medial and lateral thigh supports, lateral pelvic supports and pelvic obliquity supports can be added to the cushion
- The 'Jay Flow' fluid Tripad conforms to bony prominences, distributes pressure more evenly and reduces peak pressures. The Tripad design assists in maintaining fluid under the at-risk bony areas
- Most suitable for the client who is at higher risk of skin breakdown and who has poor skin integrity
- Ballistic Stretch & Incontinence cover also available VTOP
- All models include Air Exchange Cover
