

Ki Mobility Little Wave ALX

The Little Wave XP has the ability to move easily within its environment; where the wheels are in the perfect spot so that young people can use all of their strength and leverage to their advantage.

- It has the ability to change and grow along with the person who is using it
- Aluminium frame - extremely light, simple to use and easy to transport
- Lightweight design, easy adjustment and sleek profile
- The footplate allows for an infinite number of positions over time so it can be repositioned as the rider grows
- In-frame expansion allows the chair to grow in width by using frame Xpanders that maintain the frame's structural integrity far better than bolt-on cross bars
- The depth is predetermined by you on the order form so it will be there when you need it. Up to 76 mm can be selected
- Height-adjustable, easy to remove stroller handles make it easy for caretakers to assist the rider
- Optional rotating 5th wheel permits more aggressive positioning of the rear wheels, allowing and promoting midline wheel access
- Transit tested and approved for added safety and securement during transport
- Crescent Cg system keeps side frame free of hardware for infinite adjustability

Code	Display Name	Seat Depth	Seat Width	Safe Working Load
MWC427039	Little Wave ALX (as per script)	250 - 410 mm	250 - 410 mm	75 kg
