

## Solaris - ReadyWrap - Thigh

- ReadyWrap garments are designed to aid people living with venous disease or insufficiencies
- Created to replace daytime compression bandaging or serve as an alternative or supplement to elastic compression stockings
- Silver microfibre under-garment liner is available for added comfort
- Contraindications: arterial insufficiency or degeneration, deep vein thrombosis, untreated congestive heart failure, localised or systemic infection or cancer, absent or severely impaired sensation
- The perfect addition to the ReadyWrap knee, calf and foot units for those with full leg oedema
- When used on its own, it is also a great option to prevent localised swelling from the superior patella border to the groin
- The strapping system mimics the 50% overlap of short-stretch bandaging and reduces shear force pressure when being applied to the limb

- ✔ Contracted DVA product
- ✔ Contract approved
