

## Kineris Air Cushion

Ideal for patients at very high risk of pressure injury development. It is suitable for both active and non-active users, accommodating a large range of user heights and weights.

- **Accurate Pressure Adjustment:** Manometer enables exact pressure adjustment every time. Easy for carers.
- **Single-valve:** For simple inflation and maintenance.
- **Reduced Friction and Shearing:** Cell mobility minimises friction and shearing forces.
- **Optimal Height:** Available in low and high profiles.
- **Comfortable and Breathable:** The removable cover is stretchable, and breathable, and aids body temperature regulation during prolonged sitting.
- **Stays in Place:** The inner cover features a non-slip base to keep the cushion secure.
- **Versatile Sizing:** Available in various sizes to accommodate different needs.

## Warranty Information

- 3 years
